

Standards Actions and Public Review Drafts
Most Recent Update: October 28, 2011

When public review drafts are available or other new activities are announced, they are placed on this special chart maintained by 3-A SSI. The status chart is updated on a frequent basis.

Public Review Drafts

Copies of documents under review are available upon written request to the contact name, (via e-mail). All comments must be submitted in electronic format by the due date shown. The comments must pertain only to the proposed ballot item(s), not other parts of the document. The drafting group responsible for the document will review comments. The drafting group will respond to each comment unless it decides to submit a revised draft for another full public review.

3-A Sanitary Standards

Document Number and Title or Activity	Scope of New Standard or Revision	Public Comment Due Date	Contact to Submit Comments or Request Copy
Proposal T-101-00, 3-A Sanitary Standard for Pipeline Product Recovery Equipment Using Projectiles	This 3-A Sanitary Standard applies to the sanitary aspects of pipeline product recovery equipment using projectiles in process pipelines that transfer dairy or food products. The equipment includes a launching mechanism, a receiving mechanism, and a projectile.	December 16, 2011	Nate Wall nwall@3-a.org
Proposal T-13-12, 3-A Sanitary Standard for Farm Milk Cooling & Holding Tanks	This standard covers the sanitary aspects of tanks in which bulk milk is cooled and stored on dairy farms. Proposal T-13-12 seeks to bring the Farm Milk Cooling & Holding Tanks standard into alignment with the Pasteurized Milk Ordinance (PMO). A recent FDA-Milk Safety Branch interpretation of the Grade "A" PMO has concluded that the "bare shaft", inclusive of both the agitator and output gearhead motor shafts, must be protected. Because of this it is necessary to amend Clause D15 of Standard 13-10 to be compatible with this interpretation.	December 5, 2011	Nate Wall nwall@3-a.org

Pharmaceutical 3-A (P3-A) Standards

Document Number and Title or Activity	Description	Public Comment Due Date	Contact to Submit Comments or Request Copy
P3-A 003: 2008 P3-A End Suction Centrifugal Pumps for Active Pharmaceutical Ingredients	Revises provisions of current standard relating to permanent joints and criteria for casing drain connections.	November 25, 2011	Tim Rugh, trugh@3-a.org
